Professional Summary

Cybersecurity student specializing in SOC operations, endpoint telemetry analysis, and SIEM-based threat detection using Wazuh and Sysmon.

Built blue-team focused detection labs for IOC investigation, PowerShell abuse detection, persistence analysis, and MITRE ATT&CK-aligned incident triage.

Technical Skills

Security Operations: Threat Hunting, IOC Analysis, Incident Triage, Event Correlation, Detection Engineering, Incident Response

Tools & Telemetry: Wazuh, Sysmon, Windows Event Logs, Wireshark, VirusTotal, Any.Run, Splunk

Technical Areas: Threat Detection, Log Analysis, Behavioral Analysis, Endpoint Telemetry, MITRE ATT&CK

Programming & Scripting: Python, Bash

Security Operations Experience

Personal SOC Detection Lab Jan 2025 – Present

- Monitored and analyzed 50,000+ Sysmon and endpoint telemetry events using Wazuh SIEM
- Correlated process, registry, DNS, and network telemetry to investigate suspicious activity
- Detected persistence techniques, PowerShell abuse, and command-and-control activity
- Reduced false positives through IOC validation and telemetry baseline tuning

Projects

SentinelTrace Platform: SIEM & IOC Investigation Framework GitHub

- Built a SOC-focused telemetry investigation platform using Python, Flask, Sysmon, and Wazuh
- Implemented MITRE ATT&CK-aligned detections for persistence, execution, and suspicious process activity
- Developed detection workflows that correlated Sysmon Event IDs, PowerShell execution patterns, and DNS telemetry to identify suspicious activity and reduce false positives
- Designed analyst dashboards for incident triage and telemetry correlation

Windows IOC Scanner: Endpoint Triage & Threat Analysis Utility GitHub

- Built a Windows-based IOC analysis and endpoint triage utility using Python and pywin32
- Implemented heuristic detections for suspicious PowerShell execution and persistence mechanisms
- Generated structured HTML and JSON investigation reports for analyst review

Certifications & Achievements

Certifications Link

- Certified Blue Team Practitioner (CBTP)
- Cisco Junior Cybersecurity Analyst
- Microsoft Student SOC Program Foundations

Achievements

- Top 3% Global Rank – TryHackMe
- Finalist – CREST CTF 2026
- Winner – GDG On Campus 30-Day Challenge (2025)

Education

Parul University Expected May 2027
B.Tech in Computer Science Engineering (Cyber Security)
CGPA: 7.8 / 10.0
