Professional Summary

SOC Analyst aspirant with hands-on experience in SIEM monitoring, telemetry analysis, threat hunting, and incident investigation using Sysmon and Wazuh. Built a SOC-focused telemetry investigation platform processing 50,000+ endpoint events with MITRE ATT&CK mapping, behavioral correlation, and attack timeline reconstruction.

Security Operations Experience

SOC Analyst Trainee Jan 2025 – Present
Independent SOC Detection Lab

- Monitored and analyzed 50,000+ Sysmon and endpoint telemetry events using Wazuh SIEM
- Correlated process, registry, DNS, and network activity to reconstruct attack timelines
- Detected persistence behavior (MITRE T1547) and command-and-control activity (MITRE T1071)
- Reduced false positives through behavioral baseline tuning and contextual enrichment

Key Project

SentinelTrace Platform: SOC Telemetry Investigation Framework GitHub Repository

- Developed a SOC-focused telemetry investigation platform for Sysmon log ingestion, normalization, and behavioral analysis
- Implemented MITRE ATT&CK aligned detections for Execution, Persistence, and Command & Control techniques
- Built Flask dashboards for incident triage, ATT&CK mapping, timeline reconstruction, and telemetry correlation
- Simulated PowerShell abuse, DNS beaconing, and LOLBIN activity to validate detection workflows

SOC Detection Case Study

DNS Beaconing Detection Case Study View Case Study

- Investigated suspicious DNS beaconing behavior using Sysmon telemetry and network logs
- Correlated process execution with outbound traffic to validate command-and-control activity
- Mapped findings to MITRE ATT&CK T1071

Technical Skills

Security Operations: Threat Hunting, SIEM Monitoring, Incident Response, Event Correlation
Security Tools: Wazuh, Sysmon, Wireshark, YARA, VirusTotal, Any.Run
Threat Intelligence: MITRE ATT&CK, Cyber Kill Chain, Behavioral Analysis
Programming: Python, Bash

Achievements & Certifications

- Top 3% Global Rank – TryHackMe
- Finalist – CREST CTF 2026
- Winner – GDG On Campus 30-Day Challenge (2025)
- Certified Blue Team Practitioner (CBTP) View Credential
- Cisco Junior Cybersecurity Analyst
- Microsoft Student SOC Program Foundations

Education

Parul University Expected May 2027
B.Tech in Computer Science Engineering (Cyber Security)
CGPA: 7.8 / 10.0
