LOKITH DURAISAMY

Cybersecurity Analyst | SOC Operations | Threat Detection | Incident Response

Namakkal, Tamil Nadu, India | +91 78459 44334 | lokilokith123@gmail.com

LinkedIn | GitHub | Portfolio | TryHackMe

PROFESSIONAL SUMMARY

Cybersecurity undergraduate specializing in SOC operations, endpoint threat detection, and digital forensics, with internship and project experience. Skilled in Windows telemetry, Sysmon, Wazuh, Splunk, IOC analysis, and MITRE ATT&CK. Developed Python-based security platforms integrating behavioral detection and AI-assisted investigation; Microsoft SC-200 and SecOps Group CBTP certified.

PROFESSIONAL CERTIFICATIONS

- **Microsoft Certified: Security Operations Analyst Associate (SC-200)** — *Microsoft*
- **Certified Blue Team Practitioner (CBTP)** — *SecOps Group*

Additional Credentials: Cisco Junior Cybersecurity Analyst Career Path; OPSWAT Cybersecurity Fundamentals Associate (OCFA); Microsoft Learn Student SOC Foundations.

TECHNICAL SKILLS

SOC & Detection

- SIEM: Wazuh, Splunk
- Sysmon, Windows Event Logs
- Alert Triage, Threat Hunting
- Incident Response, IOC Analysis
- MITRE ATT&CK, Detection Rules

Network & VAPT

- TCP/IP, DNS, HTTP/HTTPS
- Wireshark, Traffic Analysis
- Nmap, Nessus
- Burp Suite, Metasploit
- OWASP Top 10

DFIR & Development

- OSINT, Digital Forensics
- YARA, VirusTotal
- Python, PowerShell
- FastAPI, Flask, React
- SQLite, MySQL, Git, Docker

PROFESSIONAL EXPERIENCE

Cyber Security Research Intern — **Jul 2026 – Sep 2026**

CyberLynk

- Analyzed Windows endpoint telemetry and Sysmon process-creation records, examining executable paths, command-line arguments, process ancestry, and hashes to investigate suspicious execution patterns.
- Reviewed PowerShell and Windows security events, correlating endpoint behaviors with MITRE ATT&CK techniques, including T1059.001 (PowerShell), to document potential security indicators.

Cyber Security Intern — **Jun 2026**

Amroha Police Cyber Security Internship Programme (APCSIP-2026)

- Conducted OSINT investigations using IntelligenceX, DeHashed, and FaceCheck to identify publicly exposed information and correlate online identities and digital footprints.
- Supported digital and mobile forensic examination and evaluated media authenticity using InVID and Deepware, reviewing available metadata, video keyframes, and potential manipulation indicators.

Cyber Security & Digital Forensics Intern — **Apr 2025 – Jul 2025**

Cyber Secured India

- Examined Windows forensic evidence using registry and application execution artifacts to investigate user activity and system-level events.
- Reviewed Windows Security Event Logs, including Events 4624 and 4625, and correlated available system evidence and timestamps to support authentication analysis and forensic timeline reconstruction.

PROJECTS

SHERLOCK – AI-Assisted SOC Investigation Platform — **GitHub**

Python, FastAPI, React, SQLite, Pydantic, SQLAlchemy, Sysmon

- Engineered a FastAPI telemetry pipeline using Pydantic and SQLAlchemy to validate, normalize, and store Sysmon-style JSON events in SQLite.
- Implemented deterministic PowerShell threat detection, duplicate-event prevention, and centralized alert triage through a React-based security dashboard.
- Integrated AI-assisted analysis into investigation workflows, supporting event interpretation, forensic review, and evidence-referenced investigation reporting.

SENTRA+ – Behavioral Threat Detection Platform — **GitHub**

Python, Flask, SQLite, Sysmon, YAML, MITRE ATT&CK

- Developed an offline Sysmon XML engine using Python and Flask to parse, normalize, and store Windows endpoint telemetry for retrospective threat hunting.
- Implemented YAML-driven detection rules using event IDs, process-image matching, and path-based conditions to identify suspicious execution patterns and LOLBIN activity.
- Integrated severity classification and MITRE ATT&CK mapping to analyze and visualize 50,000+ Sysmon events through security analytics and investigation timelines.

EDUCATION

Parul University, Gujarat — **Expected May 2027**

B.Tech – Computer Science Engineering (Cyber Security) — CGPA: 8.17/10

ACHIEVEMENTS

- Top 3% globally on TryHackMe; CREST CTF 2026 Finalist.
- Completed cybersecurity job simulations through Deloitte, Tata, ANZ, and Mastercard (Forage).
